SUMMARY

Motivated Front-end web developer with a Bachelor's degree in Computer Science. Proficient in HTML5, CSS, Bootstrap, and JavaScript. Skilled in React.js. Developed 5+ websites, ensuring responsiveness and user-friendly interfaces. Collaborated on 10+ projects using Git and GitHub. Proven problem-solving skills. Committed to continuous learning, completing 6 online courses. Seeking opportunities to contribute to frontend projects and deliver impactful solutions with a passion for coding and quick learning ability.

TECHNICAL SKILLS

Programming Languages :- JavaScript, Python

Web Frameworks :- Bootstrap, React.js

Other Tech -Tailwind CSS, AJAX, UI/UX Design

College Coursework - Unix/Linux Programming, Artificial Intelligence, Data structures and algorithms

PROJECTS

GearShift Gurus - Automotive Care Hub

- Built a Automobile Servicing Website from scratch, creating a visually appealing and user-friendly interface with HTML, CSS, JavaScript and Bootstrap ensuring an engaging user experience.
- The inclusion of JavaScript enhanced user interactivity and functionality, making it easier for visitors to explore the range of maintenance and repair solutions offered.

Whether? – An Weather Application

- The Weather Web App combines HTML, CSS, and JavaScript to create an intuitive interface.
- It fetches real-time weather data from Rapid API, providing users with up-to-date information in a visually appealing format of temperature, humidity, wind speed

JetSetGo - Travel Companion and Booking Platform

- Utilized HTML and CSS (including SCSS) to create a seamless and intuitive user experience, ensuring consistent and attractive styling throughout the website.
- Implemented JavaScript, jQuery and Bootstrap to add dynamic functionality, such as personalized destination recommendations, trip planning tools, and booking integration.

WeGo.Jim - Fitness Website Development

- Crafted an engaging, responsive user interface using HTML, CSS and Bootstrap ensuring a seamless and visually appealing experience across various devices and screen sizes.
- Executed JavaScript to enhance user engagement with interactive elements, such as clickable buttons, forms and dynamic content that adapt to user preferences.

United Trekking of India - Trekking Organization

- Designed a responsive website that provided a seamless user experience across different devices using HTML and CSS
- Featured a trek and event showcase, allowing users to browse through available options also implemented a booking functionality that enabled users to reserve their spots directly through the website.

Sai Beach Resort - Resort and Villa Booking Website

- Developed a visually appealing and user-friendly website that showcases the beauty of beach destinations using HTML, CSS and Javascript.
- Guided interactive elements using JavaScript to enhance user engagement. This includes features such as image sliders, interactive maps, and booking forms.
